**SPECIFICATION VARIANCE**

Our products are constructed to maintain close dimensional tolerances that may vary slightly during the manufacturing of materials; normally +/- 1/8", occasionally more. In most cases, this slight variation does not affect installation, appearance or function. We recommend that you measure the actual cabinet before you frame, design or finish the space for your vanity. We can not be held responsible by the end user if this guideline is not followed. We reserve the right to make revisions without prior notice to product specifications.
